*“Customizing ones cellular phone has become the fashion of the day. Most people whose cellular phones look upon their gadgetry as personal accessories”.*

Once this gets into the psyche, they feel a need to make it unique or stylish in their own way so as to make the cellular phone or mobile phone reflect their personality.

Since the majority of the populace whose cellular phone is predominantly young between 15-45 years, their tastes vary widely, affected by localization factors like country, culture, music, career, education etc. This varied taste has given rise to a great demand in variety and design of these accessories.

A mobile phone can have two kinds of accessories – hardware and software. The hardware accessories cover the fascia, earplugs and all other attachments that are physically visible. The software consists of wallpapers, screensavers, ringtones, games etc. The software being the most relative mobile phone accessory, it becomes more customizable and replaceable at a lower cost. The software is also called content.

In this article we are going to discuss wallpapers in detail. Wallpaper can be described as a graphic description which forms the background of a mobile phone's display unit. A lot of wallpapers are available depending on the model of the mobile phone in free and paid categories over the internet. In personalizing one's mobile phone by the use of wallpaper, a lot of factors should be taken. Keep in mind the following factors while choosing one:

The wallpaper that you should be choosing should have aesthetic and design

appeal and should suit your personality so that it you. Always remember that your mobile phone will be primarily your communication tools, so the wallpaper mellow and motivating so that it has a visual effect with a small pep appeal. Wallpaper today is an indispensable part of your mobile phone's life. So choosing it carefully is important.

portrays the correct image of used mostly by you and is r you choose should be to reducing stress combined spensable part of your mobile
